CO1 - Concept Mapping

Name: P. Nithesh Kumar
Reg no: 192524051

(1)

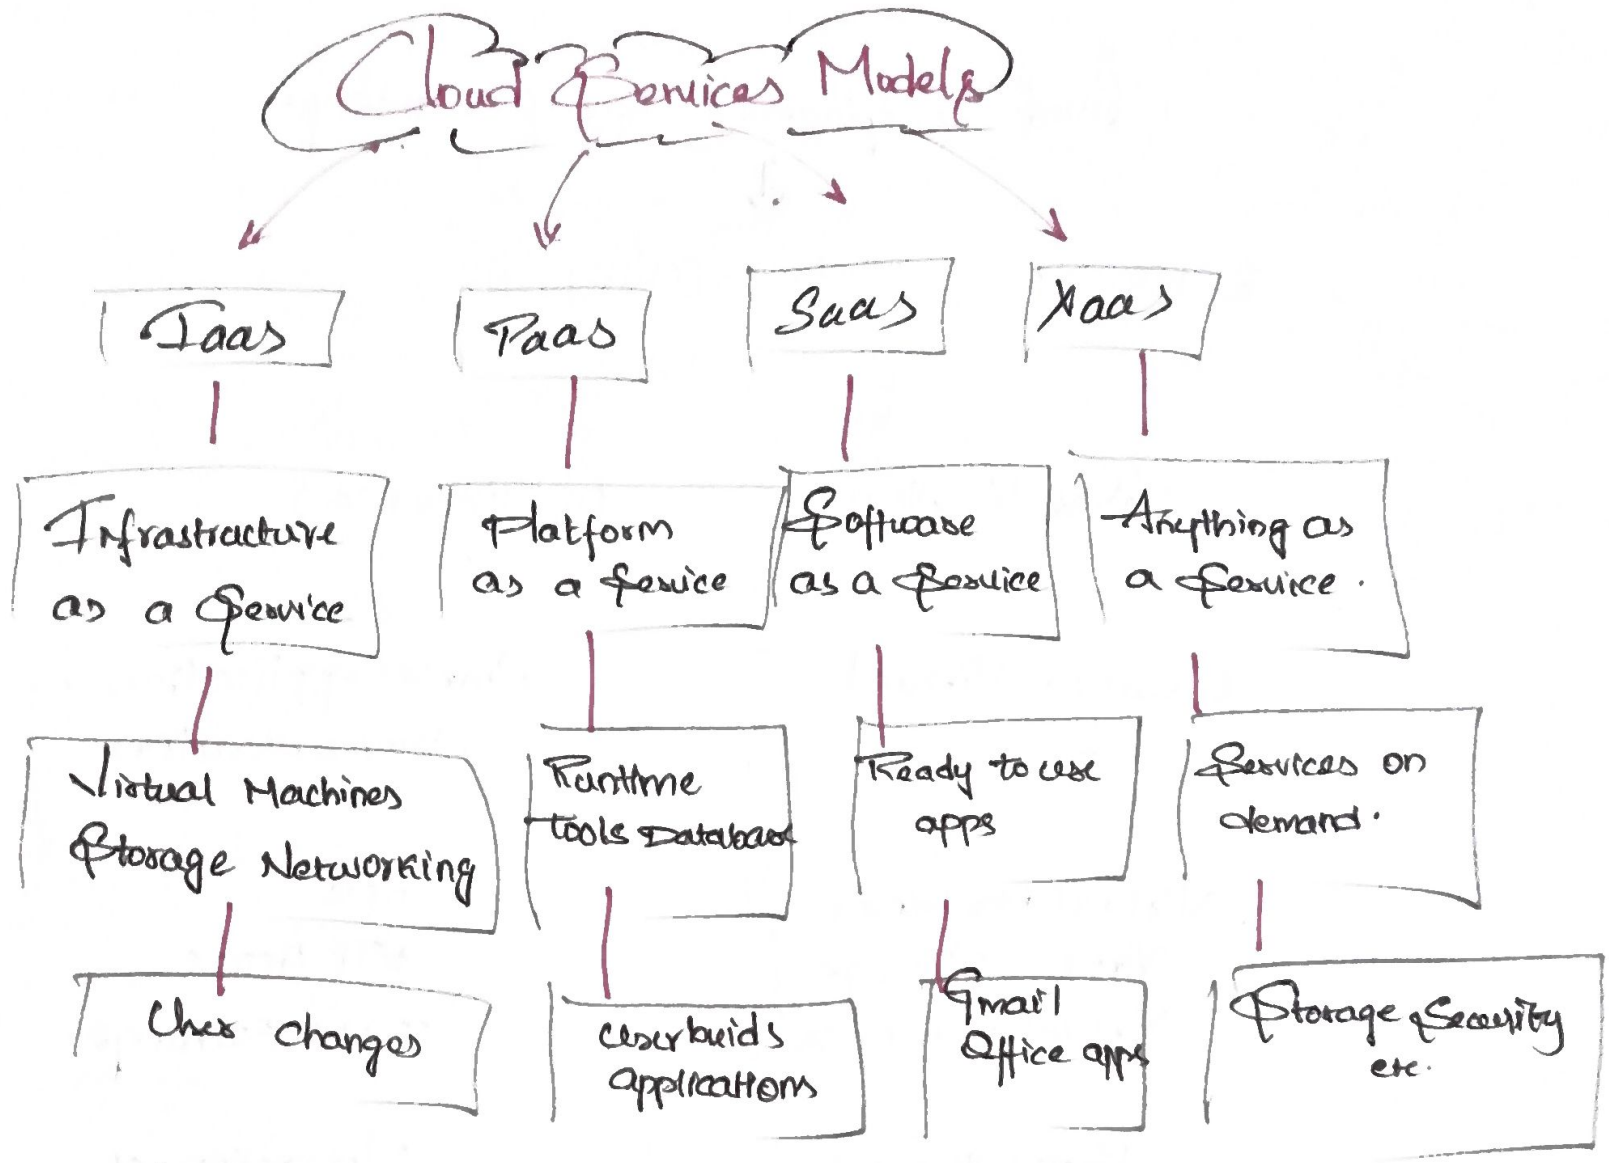

Link Labels to Write on Arrows.

* Cloud Computing Provides Internet-Based Services
* Characteristics include on Demand Access and Resource Pooling.
* Benfits include cost Savings and Scalability.
* Limitations include Security risks and Internet dependency.

Evolution of Cloud Computing

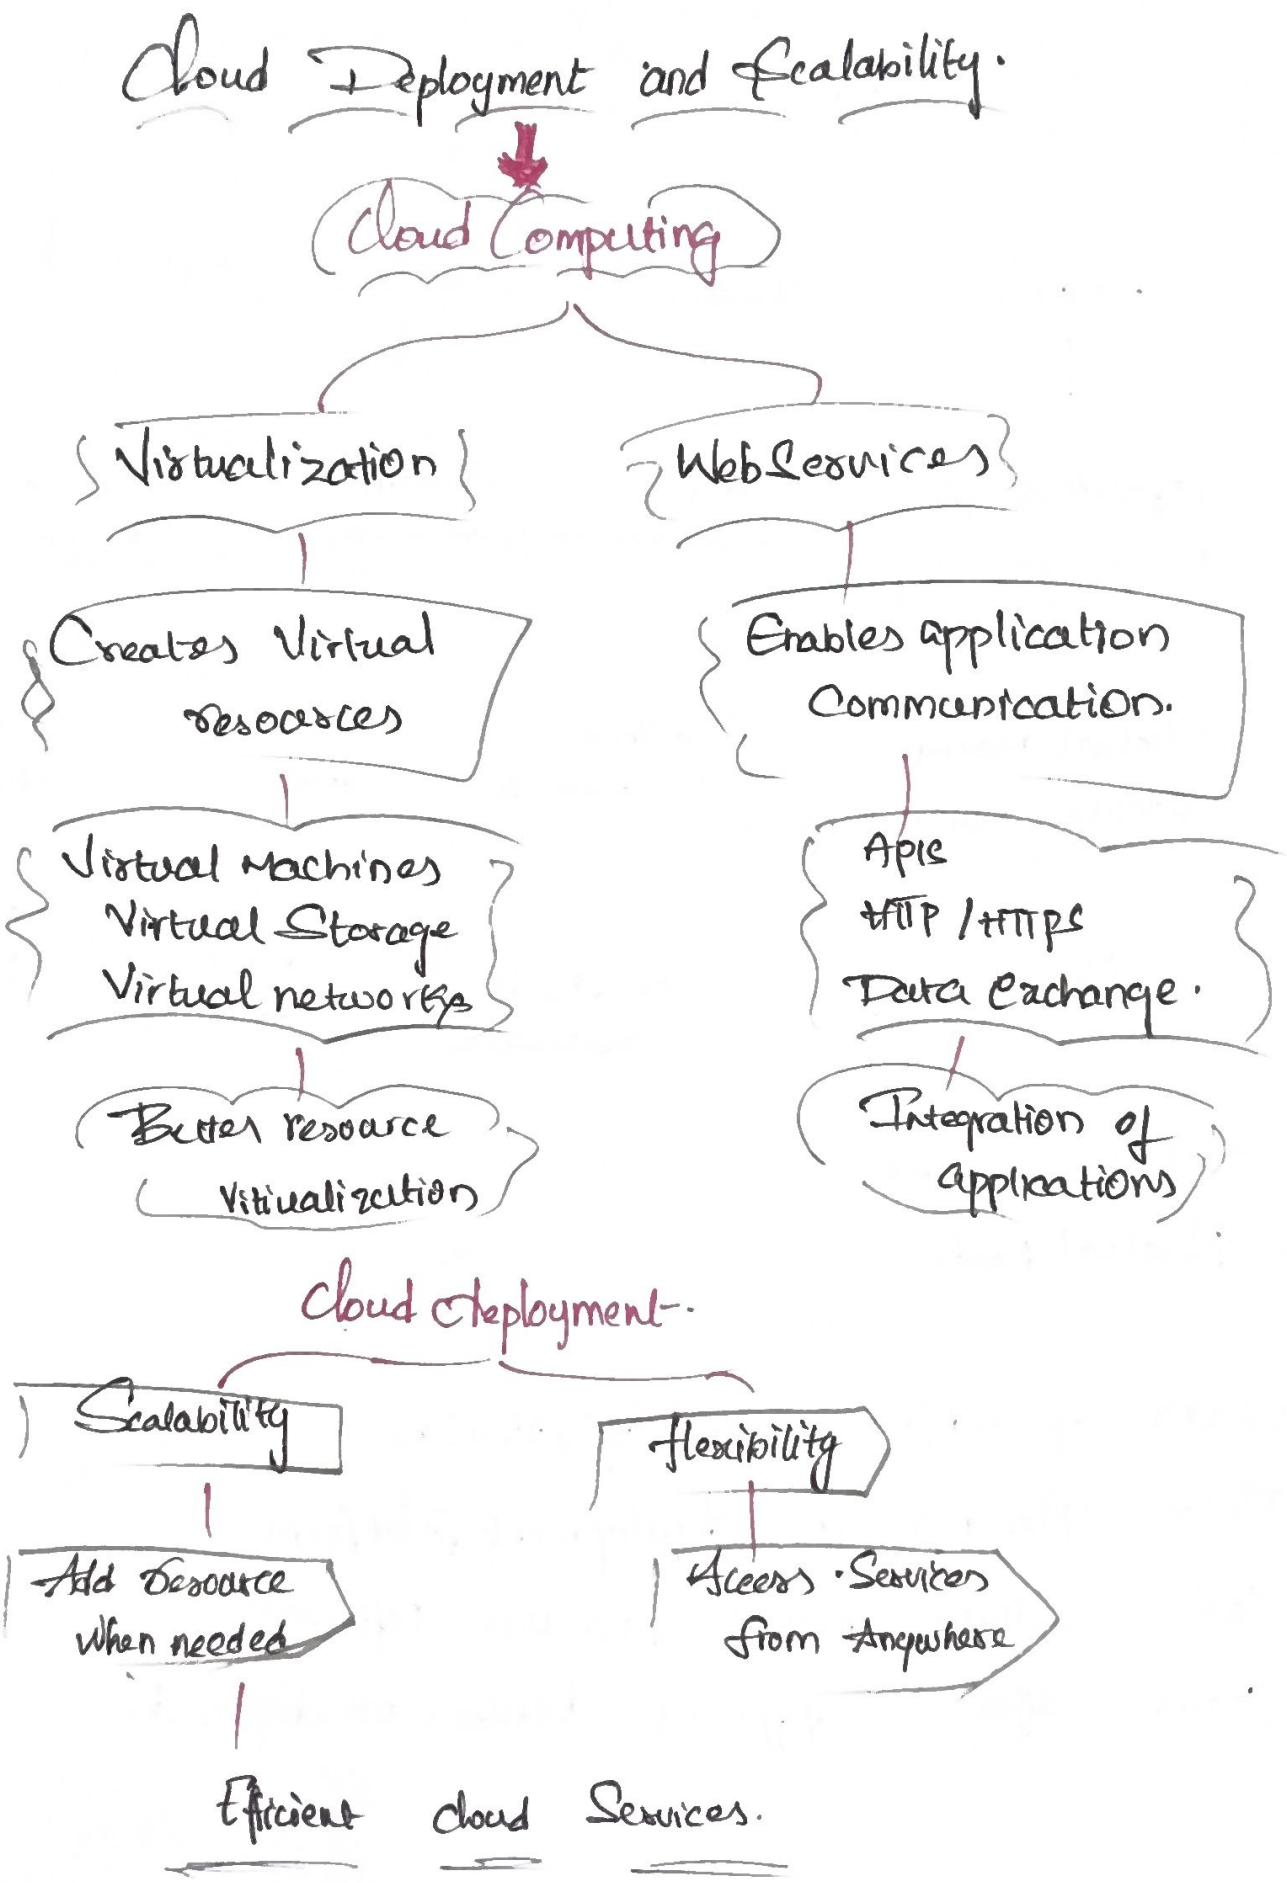

* Hardware evolution increased Computing capacity.
* Internet growth evolved remote Access.
* Distributed Systems Supported resources Sharing.

→ Provider manages
— Physical hardware.

* Iaas provides Virtual infrastructure.
* Paas Provides a development platform
* Saas delivers ready to use software
* Xaas offers different services on demand.

(4) Virtualization and Web Services of Enablers of cloud.

* Virtualization Creates Virtual Resources
* Web Services enable communication between application
* Resource pooling improves utilization.
* Api connect different applications.
